MR. EDISON'S EXPERIMENTS.

AMERICAN SATANTS INSTRUCTED BY

JILLAMINIA PARK INVENTOR.

The Pharman of Theorically Heated Metals
in Varia—Curtous Results of the Experiments Under the his Laborations—The Enterior Metals in the metals of the Association for the Advancement of Scienc to-day.

The following is the paper prepared by Mr. Edisons—The First fact observed was that platinum lost semena arising from the heating of metals by games and by the electric current, especially wires of platinum and platinum alloyed with indiam. These experiments are in progress.

The first fact observed was that platinum lost spanned A. A platinum wire four-thousands as incoming the platinum wire four-thousands as incoming the process in accordance in the metals colored the flame green, and that the metals colored the flame streem, and that the pate of a fraction less than one milligramme per hour as long as it was suspended in the pate of a fraction less than one milligramme per hour as long as it was suspended in the pate of a fraction less than one milligramme per hour as long as it was suspended in the pate of a fraction less than one milligramme per hour as long as it was suspended in the pate of a fraction less than one milligramme per hour as long as it was suspended in the pate of a fraction less than one milligramme per hour as long as it was suspended in the pate of a fraction less than one milligramme per hour as long as it was suspended in the pate of a fraction less than one milligramme per hour as long as it was suspended in the pate of a fraction less than one milligramme per hour as long as it w command when the temperature of the wire is a fiscal above that of the flame by passing a current to the flame by passing a current to the flame by passing a current to the flame by passing a current flame. To severain the diminition in the selectic current, in the selectic current. To severate the diminition in the selection current is placed between two clausing flames and weighting 266 milligrammes. This is the selection of the selection of

accepted became visible. In a sealed glass builty acknausted by a Sprengi nump to a point where a quarter of an inch spork from an induction was reasoned to an inch in the spork from an induction where a guarter of an inch spork the connecting wires passing through the glass. This spirit has been kept at the most dazzling incandescence for hours without the slightest deposit becoming visible.

I will now describe other and far more important them are a discrete in my experimental problems of a limit of the reason where the held in the fame of a Bunsen burner, at some part it will fuse, and a piece of the wire will be bent at an angle by the action of the globule of melted platinum; in some cases there are several globules formed simultaneously, and the wire will be bent at an angle by the action of the globule of melted platinum; in some cases there are several globules formed simultaneously, and the wire assumes a zigrag shape. With a wire four-thing the series of th

ature.

Ally experiments with many metals treated by teles process have proved to my satisfaction, and I have no hestation in stating that what is known as amealing of metals to make them sett and plable is nothing more than the cracking of the metal. In every case where a hard drawn wire had been annealed a powerful microscope revealed myriads of cracks in the metal. Since the experiments of which I have just spoken I have, by the aid of Sprengel mercury pumps, produced higher exhaustion, and

great practical utility in measuring strong currents.

A method was proposed for measuring the energy in the carbon are, based on the principle that the distribution of work in an electric circuit is proportional to the fall of tension; and the same method proposed for studying the laws of transmission of power by the Faradie machines. This critorion was given to judge a machine by to have the smallest resistance with the greatest electromotive force, the power consument in the magnets and the cost of machine and spark on the commutator being considered. It was also stated that Mr. Edison had obtained from a machine running at 760 revolutions in aminute a tension equal to 125 cells of Daniel's the armature having only six-tenths of an Ohm resistance, and only one-sixtn of a horse power being consumed in the magnet.

JUSTICE GEORGE E. KASMIRE,

The Beath of the Police Magistrate after a

Stroke of Paralysis. Police Justice George E. Kasmire died on Monday evening at his residence, 24 Bank street, of paralysis. The Justice's illness lasted just three months, the first attack taking the 1st of June, and his death on the 1st of September. He was born on the 22d of March, 1840, and attended the public schools, from which he graduated with honors. He entered Yale College and studied several years. but his health gave way, and he was compelled to relinquish his studies. He came back to New York and commenced the study of law. He was admitted to the bar at an early age, and made a good record as a pleader and office lawyer. Shortly after the beginning of the rebellion he began to take an active interest in politics, and was looked upon by the Republicans and Union men of the Tenth Ward as one of the rising men of the Tenth Ward as one of the rising young men of the west side. At the age of 21 he obtained the appointment of Assistant Provost Marshal. In 1865 he retired from the Provost Marshal in 1865 he retired the Provost Marshal in 1865 he retired from the Reform ticket in 1871-72. In 1873, when the Havenever administration came into power, the old Ring Police Justices were legislated out of office and the Mayor and Aldermen given bower to appoint a new Board of ten. It was agreed between the majority in the Baard and the Mayor that five of the number should be Republicans and five Democrats, and among the first of the Hepublicans to be appointed was Mr. Kasmire. In the canvass of 1877, Justice Kasmire interested himself strongly in the Seward-Wagstaff contest for the Senatorship—so much so that his brain became for a time affected. His malady was first noticed by his stranger remarks in court and the curlous questions he propounded to winnesses. When his real condition was discovered his brother Justices kindly arranged to supply his place, and allowed him every possible opportunity to retruit his health by rest and recreation. Notwithstanding his former illness from political overwork, he threw himself with zest into the McCook Congressional canvass of the contest in behalf of the McCook, his excuse being that the latter was his old personal friend. Early last spring the old brain troubles were remarks in young men of the west side. At the age of 21 he obtained the appointment of Assistant

and 21 Broad street, have become so notorious through newspaper publications that the old Stock Exchange house of Lawrence Broak Co., 31 Broad street, deem it occassary to publish a card appealing to the public not to confound their firm with the one whose operations were so fully expessed a year ago. The card is printed elsewhere.

ITALIAN LOVERS UNITED

AFTER A COURTSHIP THAT HAD UN-COMMON DIVERSIFICATIONS. Angelina Occhetti Married to the Man Who

Had Threatened to Kill Her-The Story of a One Elopement that Ended Huppily. Three young men and a lady partly velled crossed from the Eighth street station of the elevated railroad and entered the lobby of the Jefferson Market Police Court a few minutes after Justice Bixby had adjourned the court yesterday afternoon. On seeing the placard on the door, one of the young men heatily pulled out his watch, and noting the time, spoke in French to his companions. Then he knocked at the door, and when a court officer's face appeared at a crack he asked for permission to

enter. "Court's adjourned, and the Judge is going home," was the response.
"But this is something important. I want

him to marry two persons here." "Woil, I'll see what he says," "Hand him this eard, then," the young man

said, thrusting through the crack a business While the officer was away the party conversed in low tones near one of the windows. They were interrupted by "Judge says he don't

write to him and return to him and be his wife. He wrote:

I bee of you. Lena, to relieve me of this painful suspense. What have I done that you should abandon me a second time? Do what you think beet, only write me whiether or not you wish me as your husband. I can say no more. I address you with bears in my eves. If you do not write to me I will find you out. Then your intuity and my family will be sorry for what will happen. I sak nothing more than one true letter. Remember that Edwardo has recented and loves you always. Have rily on me. Lena, but remember that if I have to seek you out will kin you without pity.

Adelina was advised to have her lover arrested, and she got a warrant. He was surprised and humiliated when an officer arrested him, but he made no resistance. To Justice Morgan he said, through an interpreter, that he knew that he had acted wrongly in threatening Adelina, but he had; repented. His only wish was to marry her. In two years he would receive an inheritance of \$80,000, he said, and he would give her half of it. He was afraid that harm might happen to Adelina if she did not marry him.

Justice Morgan replied that Edwardo should try to win Adelina by kindness and not by threats, and then allowed him to go on his promise to keep away and not annoy Adelina, but he subsequently asked the young woman's lawyer to try to have the quarrel settled amicably. In the lobby Edwardo, as he passed Adelina, said that if she would not marry him he would kill himself.

Before many days had passed the lovers met. She listened to the protestations of his love, and at length yielded to his entreaties to be his wife. On Monday evening the arrangements for the marriage were made, and she met her lover in Mr. Cuppia's law office in Park place yesterday, From there they went to the court room.

Officer John Gerraghty of the Fifty-ninth street police ordered some members of the Phornix Clib from First avenue and Forty-seventh street on the evening of the lith ult. They moved away, but John Doane of 744 Second avenue turned and fired twice with a revolver at Officer Gerraghty. Doane rantoward the East River, but Officer Gerraghty pursued him. Doane fired again at him, and he returned the fire. Doane was arrested the heatiday, and he was convicted in the Seneral Seasons of simple assault, in view of the itset that there is no evidence that Officer Gerraghty was womased, not that the revolver was insided with hall.

I will not heatiste. Judge Cowing said yesterday to That the revolver was insided with hall.

I will not heatiste. Judge Cowing said yesterday to Dane. To timpose the heatist penalty that the law all pounds to the property of the second that may be cited for the carrying of a weamon. Increasing the same is same in the control of any peaceful, law adding man. I sentence you to the pententiary for one year.

Colored Pupils Demanding their Rights,

Colored Pupils Demanding their Rights, CHICAGO, Sept. 2.—About thirty colored boys made a demonstration in the Lincoln, lil., High School, claiming their right to admission. They were denied entrance, and ordered away, but they threaten to take legal measures to secure the same rights in the High school saw white children. The School Board asserts they are entitled to admission to the common schools, but that the brate Supreme Court has held that town authorities can har them from the High School. They also claim that official influence has canned them to make the present demand, and not any desire of their own.

LIVELY RACES ON BRIGHTON BEACH. Large Fields of Horses in Yesterday's Con-

About 2,000 persons attended the Brighton Beach races yesterday. The fields of horses were large, twenty-seven fivers taking part in the first three races. All the contests were close and exciting, and the time made was excellent for the course. The dividends in the pools showed that the knowing ones, who put

up their money freely, were all at sea. The sport began with a race of one mile and a furlong, \$250 to first and \$50 to second horse. The starters, weights, and rates at which they sold in the pools were: Claudia, 3 years, 101 lbs., \$50; Enterprise, 3 years, 101 lbs.; Corrilia, 3 years, 104 lbs., \$28; Janet Murray, 4 years, 115 lbs., \$21; Sunlight, 4 years, 115 lbs., \$12, with Little Jim, aged, 124 lbs.; Le Roi, 4 years, 115

marry anybody," as the officer handed back the

years, 104 ibs., \$28; Janet Murray, 4 years, 115
bs., \$21; Sunlight, 4 years, 115 ibs., \$12, with
Little Jim, aged, 124 ibs.; Le Roi, 4 years, 115
bs.; and Heimsman, 4 years, 118 ibs. in the
field at \$17. A very close race followed the
dropping of the flag, all running well, bunched,
except Helmsman, who hung back in the rear.
It was anybody's race to within sevenity yards
of the finish, when Sunlight burst through to
the front, winning by a short length, Claudia
second, Janet Murray third, and Enterprise
fourth. Time, 2:01. French tickets, \$57.
This was followed by a spin of three-quarters
of a mile, \$150 to first and \$50 to second horse.
The horses, weights and rates were: Exput, 122
bs., \$51; Dairy Maid, 106 ibs., \$40; Meco, 119;
Lilian, 106; Pirate, 106; Pique, 115; Caligula,
118; Meilie McGlinley, 106; Allevuer, 118; and
Dora Doon, 106 ibs., in the field at \$90. Like the
first race, the horses flew away well together,
making an exciting brash around to the finish,
with the exception of Dora Doon, who larged
far behind. At the three-quarter pole Pirate
led the rushing squad, Coming down the
stretch he drew away two lengths at the wire,
Meco second, a head in front of Exput third, in
the fast time of 1:18. French fives, \$30.55.
The third race was a struggle of one mile and
three-quarters for a purse of \$550, second horse
to receive \$50; the winner to be soid at nuction
under the rules. The horses and prices at
which they sold in the pools were; Viceroy, \$150;
Willle D., \$70; Albert, \$60; Surge, \$50; Bill
Dillon, \$40; with Lucky Hit Patrol and Nipper
in the field at \$51. Bill Dillon carried the top
weight, 111 Bis., and Lucky Hit the lowest at 86.
A beautiful race followed the send-off, Lucky
Hit showing the way for half a mile neck and
neck with Albert. Albert soon relinquished the
lead to Vescoy who in turn was compelled to
give way to Willie D. The two latter ran a desperate race, well lapped in the last half mile,
Willie D. bounding ahead just as they reached
the wire. Actor
of two miles, over eight hur

the elbow. Then Harry Leslie walked the tight rope at the distance of thirty feet from the ground, first in tights and afterward in the garb of a very medest old woman.

All this time the wheels of fortune were running, the jewelry cases were througed by anxious speculators, the chuckaluck beard was well patronized, the prize-package man had a stendy succession of customers who met with anything but success, and the rouge et noir table in the old Morris mansion did a thriving business for the dealer.

In the evening there was a real marriage solemized according to the ritual of the Lutheran Church. The bride and groom and their attendants were the costumes of the North German peasants an old Dutch hymn was sung, and the happy pair were made one. Several very pretty tableaux were presented, and a funny sketch, representing Taimage preaching himself neross Niagara, provoked screams of laughter. A fine display of freworks closed the day's entertainment. To-day there will be a walking match, in which five Platicutch maidens will compete for gold and silver medals, and another from which all but fat men will be excluded.

RAILROAD MANAGEMENT.

RAILROAD MANAGEMENT.

The Inquiries to be Continued Hereafter in New York City.

Saratoga, Sept. 2.—The Railroad Investigation was resumed this morning. Mr. Sterne put the following in evidence, which were

marked as exhibits:

Title 5, part 4, chapter 1, section 7 of Revised Statutes against unlawful combinations; copy of Jay Gould's settlement with the Eric Railroad; petition in the soil of the Farmers' Leona and Trust Company against the Eric Railroad Company; minutes of meetings of the Directors of the Eric Railroad Company in the Spin Railroad Company in the Spin Railroad Company in the Oct 19, 1874, Jun. 14, 1875, March 11, 1875, June 19, 1875, and June 29, 1876.

19,045,829 71 \$10.045.829 71 At 10% A. M. the Committee adjourned. A sub-committee will meet in Rochester on Sent. 10. and in Buffelo on Monday or Tuesday following. The investigation will be continued hereafter in New York.

SIDNEY P. NICHOLS'S CASE.

THE MATOR'S COUNSEL ASKING FOR AN EXTENSION OF TIME.

Mr. Townsend Averring that the Request is only for the Purpose of Keeping his Client Ont of his Place as a Commissioner of Police. The case of Police Commissioner Nichols

was before Judge Westbrook, yesterday, upon an application on behalf of the Mayor for an extension of time to make a return to the writ of certiorari granted some time ago by Judge Westbrook for a review of the proceedings before Mayor Cooper, resulting in Commissioner Nichola's removal from office.

Mr. F. N. Bangs, on behalf of the Mayor, say-

ing that an appeal had been taken from the order directing the writ to issue, suggested that the return of the Mayor should be postponed until the determination of the appeal that is to be argued at the General Term in the Third Department in Albany on the first Monday of

Mr. John D. Townsend, for Mr. Nichols, said that the appeal of the other side was simply instituted for delay. Mr. Nichols was now out of office, though the decision granting the writ entitled to a speedy hearing. There was no merit in the appeal, and upon the assembling of the General Term he would make an application to dismiss it. The Code was specific that an order to be appealable must be one affecting a substantial right. An order like this, merely directing a writ of certiorari to issue, did not

directing a writ of certiorari to issue, did not affect any substantial right, and could not do so until a hearing by the Appellate Court after a return had been made.

Judge Westbrook said he would not pass upon this branch of the motion, but would hear what clse the Mayor's counsel had to offer.

Mr. Bangs read an affidavit by Corporation Counsel Whitney, in which he averred that most of his associates had been out of town on their vacations so that they could not attend to this matter, and that his own time had been so fully occupied with other business that he had been unable to make a return on behalf of the Mayor up to the present time, and he had been obliged, consequently, to employ extra counsel. Twenty days would be required to make out a return.

obliged, consequently, to employ extra counsel. Twenty days would be required to make out a return.

Mr. Bangs said he was called into the case only two days ago, and time would be required to prepare the return as much sifting of facts was necessary and the questions presented were of great gravity, and largely involved the administration of public affairs in this city.

Judge Westfrook said that the case presented questions which, in his opinion, should be reviewed and settled in the Appeliate Court.

Mr. Townsend said he agreed with Mr. Bangs as to the importance of the questions involved, and, therefore, a speedy determination of the reasons presented was most desirable. He then read an affidavity by Mr. Nichois, that by the determination of this court, rendered by the Hon. T. R. Westbrook upon a correct recital to him in my affidavit of the proceedings had for my removal, it was practically adjudged that I was entitled to my position as Police Commissioner of the city of New York. The application made by the Mayor of the city of New York for an extension of time to file a return is made solely for the purpose of delay, as I verily believe, and if an extension of time until a decision of an appeal from that order directing a certiferari to issue be granted. I will be greatly prejudiced by the delay, and my reinstatement to my rightful position greatly delayed."

Mr. Townsend read further affidavits that the printed pamphiet of the proceedings taken by the Mayor had been gotten up by nim and printed and circulated. He offered copies to the other side in order to enable them to make a return.

Mr. Bangs said that the other side were very kind.

as yellow accords to its self-governing colonies freedom of action which is limited only by imperial considerations. The inshore fisheries are the inalicanable heritage of Canada and New foundland, and these countries must say whether, and on what terms, participation in them should be granted to a foreign country. It is somewhat surprising that the United States, which owe their existence as a nation to the assertion of the very principle that a whether after the same principle when asserted on heiself of Canada, The intrinsic value of the property demanded on the occasion of the Fertune Bay fracas is a mere trifle as commared with \$103,000, and as that sum is the American estimated of some two or three bays beaut of some two or three bays beaut that the Canada of Some two or three bays beaut than the people of the United States have been interest willing to allow. It is satisfactory to find that the Government at Washington repudicable all interest of some two or three bays being the theory of the States have been therefore willing to allow. It is satisfactory to find that the Government at Washington repudicable all international matter had been reduced. In fortunation the work of the shorts of the state whether, and on what terms, participation in them should be granted to a foreign country. It is somewhat surprising that the United States, which owe their existence as a nation to the assertion of the very principle that a colony must have a voice in any negotiations which affect its interest, should not understand the same principle when asserted on behalf of Canaia. The intrinsic value of the property demanded on the occasion of the Fortune Bay fracus is a mere trifle as compared with \$103,000, and as that sum is the American estimate of some two or three boats being prevented from making a single catch of fish, it looks as if the fishing privileges granted by the treaty of Washington were of greater value than the people of the United States have been hitherto willing to allow. It is satisfactory to find that the Government at Washington repudiated all intention of asking any reconsideration of the Halifax award on the ground of subsequent ill-treatment of fishermen. Were the Fortune Bay claim the only surviving difficulty in connection with the fisheries question, it would seem to show by its insignificance the dimensions to which a formidable international matter had been reduced. Unfortunately the whole question will soon come up again. Any further arrangement on the Halifax pian, unless proceeded by a final and conclusive settlement of the headlands dispute and the rights of American fishing vessels in British North American ports, would be unsatisfactory. Seeing that the fisheries question is as old as the war of 1812, and that it is, happily, the only grave question between the two countries, surely it calls for diplomatic action to settle it immediately and forever.

for themselves how much is true and how much is take.

So far as the Times is concerned, there was no violation of confidence and no exaggeration. De Land voluntarily detailed the whole story to the Times reporter without exacting the slightest pledge that it should not be used. The fact is, the fellow is two-thirds crazy, and this is the most charitable construction that can be placed upon his conduct. * * De Land is a moral and mental monstrosity. In many respects he is conscientionally honest, as he unionitedly was when detailing to the Times reporter the full story of his wrongs. Every statement made by him at that time curporting to be fact can be overwhelmingly substantiated. He has been aggravated to exasperation to-day by being told that he was a fool to give his case away to the Chicago Times, and ought to reistablish himself by denying that he gave it away.

CLOSING PRICES. to pour and another to make out a return from this season the year, as much sitting of facts and at the season they are as much sitting of facts are the force of the function of the function

make a return, as these questions could not interfere with the ability to make such return.

Corporation Counsel Whitney asked that their motion to extend the time to make the return, if granted, should not be prejudicial to any other they might have to make.

Judge Westbrook said he would settle only what was before him—the application for an extension of time to make a return pending a hearing on the appeal from the order allowing the writ. He promised an early decision.

THE DOMINION FISHERIES.

Existing Differences Reviewed from the British Standpoint.

From the Lambor Times.

The opinion expressed in the United States that the whole question should be settled between the State Department and the Foreign Office, without the North American colonies having a voice in the matter, betokens a misapprehension of the policy of the British Empire.

Office, without the North American colonies having a voice in the matter, betokens a misapprehension of the policy of the British Empire.
